

PT3 WORKSHOP EVALUATION: Winter 2002

Please help us evaluate the effectiveness of workshop sessions by circling the number that best matches your satisfaction level with each workshop topic. (For sessions relating to Internet or software training, please respond only to the training sessions in which you participated.)

Key: 1—strongly disagree 2—disagree 3—neutral 4—agree 5—strongly agree

The workshop sessions helped me develop skills in the following areas:

	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>	<u>AVG</u>	
1. Project demonstrations by consultants (Friday evening, January 18)	3	12	4	8	4.8		
2. MarcoPolo				5	8	4.6	
3. Problem Solving Process (Friday evening, February 1)				6	9	4.6	
4. Rubric assessment tools				8	8	4.5	
5. Kidspiration				3	13	4.8	
6. Storybook Weaver				1	3	8	4.6
7. Kidpix				2	4	4	4.2
8. PowerPoint					3	9	4.75
9. Web Page Design					3	1	3.5
10. Development of collaborative technology projects					7	8	4.5
11. The workshop improved my skills for teaching with technology.					1	16	4.9

Please list two suggestions you have to make this workshop more beneficial for teachers who will be involved in the next round of professional development for this grant project.

- I thought it was wonderful and I learned a lot.
- I really thought the time was adequate for us to achieve success.
- More time with the rubrics and with smartboard.
- More time on rubrics and more time to explore MarcoPolo myself.
- More 1-on-1.
- I thought it was excellent.
- Everything seemed to work well.
- Perhaps just doing two software programs at a time (i.e., kidpix and PowerPoint).
- Come to the session with a specific project/topic to develop. Have a beginning training to learn and play around with the software, then a second training to develop a lesson.
- I really can't think of any.
- Have participants bring specific curriculum materials the second week.
- I have none as long as each of us is given a collaborative working partner. This class is set up so that it is the "ideal" learning experience.
- I think it was wonderful!
- Have us bring projects we did or have us bring questions on problems.

Please describe a technology project you would like to develop and implement, with assistance from a VCSU preservice teacher, in your classroom.

- PowerPoint and Storybook Weaver
- Do a Storybook Weaver project or Kidpix
- PowerPoint or Kidpix
- PowerPoint—reports on different countries
- I would like to develop a career project for middle school students.
- Storybook Weaver—I would like to have my students write books. I would like to have a practicum student work with me and my students.
- PowerPoint presentation on a novel. I would be ready to start in two weeks.
- Tour of Valley City to share with Pen Pals in Nevada
- Develop a writing project with Storybook Weaver, but since it is not available at our school I might have to use Kidpix.
- Either setting up portfolios or Kidspiration
- Web page. Carissa Zimmerman, my student teacher for five weeks, will assist with my kindergarten program with a PowerPoint or Kidspiration presentation.
- I have two science collaborations that will be happening in February and March. With our plant science inquiry studies I will be completing a PowerPoint on each experimental station (eight). I also will be creating some language arts projects with Kidpix.
- I would like to further my skills on putting together a slide show.
- I have a lot of ideas to work on for my TWT project—using Kidspiration and Kidpix on the subject of birds. I would love to have help!
- I want to use Kidspiration, using it in dinosaurs, teeth, and the solar system.

Please describe any assistance you might need from PT3 grant administrators to complete this project.

- Maybe a phone call for a few reminders
- I need to find out the resources we have at our school and then proceed.
- The software for Kidpix Deluxe and Inspiration
- A student helper. I'll call for help in getting software purchased.
- Help with the purchase of a Claymation kit
- I may be calling for assistance in writing a grant for a Smartboard.
- I would like to have a practicum student work with me and my students
- I have a practicum student who is currently working with me.
- I would like a preservice teacher to help me and a color cartridge would be nice if that's possible!
- We would need the software for Kidpix Deluxe and Inspiration.
- Color printer/cartridge
- Color cartridge for printing—please!
